

RIOT OVER HOME RULE IN HOUSE OF COMMONS

Ministers Taunted With Epithets, 'Traitors' and 'Apes'; Premier Asquith Causes Storm Over Rescinding Resolution

LONDON, Nov. 13.—The house of commons was the scene tonight of a riot over Premier Asquith's proposal to rescind the action of Monday, when the Unionists carried by a majority of 22 Sir Frederick Banbury's amendment defeating the most important financial feature of the home rule bill.

The Unionists refused to permit the debate to go on and the speaker was forced to adjourn the session on account of the disorder. This is an extremely rare necessity and the situation is considered critical.

The Unionists almost unanimously declared that they will continue to make business in the house impossible unless the prime minister rescinds the amendments of the home rule bill. These declare that his action is unprecedented and will be resented by similar measures. Then, after a brief discussion, the speaker adjourned the session.

The speaker for extended time, and Premier Asquith's speech was interrupted by the Unionists. The speaker has not been heard since the adjournment. The situation is considered critical.

Called "Traitors" and "Apes."
The Unionists were taunted with epithets like "Traitors" and "Apes." Sir William Hall, Liberal member, personally was ordered from the floor on account of taunting Mr. Asquith.

After a preliminary vote, the Unionists declared that they will continue to make business in the house impossible unless the prime minister rescinds the amendments of the home rule bill. The speaker adjourned the session.

When the session began, the Unionists were taunted with epithets like "Traitors" and "Apes." Sir William Hall, Liberal member, personally was ordered from the floor on account of taunting Mr. Asquith.

Asks Amendment Be Rescinded.
The substance of Mr. Asquith's motion was that the Banbury amendment be rescinded. "Notwithstanding anything in any standing order of this house," and that the order of the house in respect to the home rule bill, which was passed on Monday, be rescinded.

The effect of this would be to nullify the action of the house on Monday, and the order of the house in respect to the home rule bill, which was passed on Monday, be rescinded.

Andrew Bonar Law, leader of the opposition, had the floor quickly and inquired whether there was any amendment to the government's course, and whether it would not be better to leave the matter to the house of commons.

And, in opposition, the speaker replied that he could find no precedent for rescinding a decision of the house arrived at during the passage of a bill. Whether it would destroy the safeguards, asks a matter of which every member must form his own judgment, he said.

Parliamentary Discussion.
There was a long parliamentary discussion and then Mr. Asquith said that no notice had been given of the amendment offered by Sir Frederick Banbury and that its discussion was being delayed by the members on either side had appreciated its importance.

Mr. Asquith said that he had no intention of rescinding the decision of the house, and that he would not be responsible for the consequences of such an action.

Mr. Asquith said that he had no intention of rescinding the decision of the house, and that he would not be responsible for the consequences of such an action.

PANAMA CANAL RATES FIXED BY PRES. TAFT

*American Ships Exempt From Toll, While
Foreign Ships Must Pay \$1.20 Per Ton
for Merchandise in Transit*

WASHINGTON, Nov. 13. President Taft tonight issued a proclamation fixing the dates that foreign ships shall pass through the Panama canal. The proclamation, made under authority of the canal bill, passed by Congress last year, states that no merchant vessel of 5,000 tons or more

The president based his declaration of war upon the report and investigation of Prof. Emory R. Johnson of the University of Pennsylvania, an expert designated by executive order for the task.

2. Upon vessels, in standard, without passengers or cargo, 40 percent less than the rate at tolls for vessels with passengers or cargo.

3. Upon vessels, other than mailboats, fishing, fishing, hospital ships and supply ships, 50 cents per displacement ton.

4. Upon army and navy transports.

The report has been awaited with interest by shipping interests throughout the world.

Self-Sustaining in 20 Years.

According to Prof. George Johnson's report to the president, also made public tonight, the Panama canal should become a self-sustaining basis in 20 years. It should compete successfully with the Suez route for the traffic

The second set of data will prepare the estimates of the companies' losses, based on the information available from the companies' records. The data will be used to estimate the losses of the companies in the following way:

and prescribe such rules for the measurement of vessels and such regulations as may be necessary and proper to carry this proclamation into full force and effect.

American Ships Exempt.

American coastwise shipping was exempted from toll payment by congress. It was to this provision of the act that Great Britain protested, but no reference to the protest was made in the president's proclamation. American shipping probably will correspond closely with the treaty that may then be entered through the Suez canal. The United States will obtain enough revenue from foreign vessels to pay all fixed charges, provide a sinking fund

The Johnson report shows that a foreign traffic of about 2,000,000 tons may

Campaign

PRINCETON, N. J., Nov. 13. (Press.)

dent-elect Wilson announced tonight that he proposed to carry out the pledges he made in his campaign speeches to "open the doors of opportunity to all" by abolishing "artificial competition in business and to destroy private monopolies."

The president-elect had been asked whether the big correspondence he received after his election contained any intimations as to his attitude on the tariff.

Wilson left Cumberland in February, 1912, to regain the health, enjoying at Asheville, N. C., Saranac Lake, N. Y., Tucson and Prescott, Ariz., and finally coming to Colorado Springs. When a

or monopoly problems.

Most of the letters," he replied, "were of a congratulatory nature. There are some cabinet suggestions, but nobody seems to think it necessary to ask questions about the tariff or the monopolies."

Considers Extra Session.

Movement for a hospital was started recently at Cumberland, he wrote a pathetic letter and sent a large contribution. He was married and is survived by his mother, Mrs. John T. Stanley, of Cumberland. The father died several years ago.

Mr. McRae was founder of the

In his campaign, does he the govern-
or often reiterate that revision of the
tariff should be undertaken immedi-
ately? It is believed that this idea now
will find expression in a call for an
extra session of Congress.

Governor Wilson has in hand a fairly complete list of all the men who have expressed themselves publicly in the advisability of an extra session. It is known that the president-elect has

made up his mind on the subject and soon will make known his attitude. He is of the idea the work of tariff revision cannot be undertaken without a series of long investigations. He was informed that New Jersey congressmen

There have been investigations in every congress, the governor remarked. "We studied the problem all

any life. I think there is a definite idea of what ought to be done."

Doesn't Read "Speculations."

While the president elect is reading

Hydro-Aeroplanists to Train for Army Entry This Winter

WASHINGTON, Nov. 13.—Experiments to train a considerable number of hydro-aeroplanists for the army this winter are being made on an island in San Diego harbor having been selected for the purpose.

Glenn H. Curtiss with the men in addition to his hydro-aeroplanes, the army will have a "flying boat" in the advanced type of the hydro-aeroplanes.

The army had flyers will do their winter work at Anacapa, Cal., and the navy aviators will go to Guantanamo, Cuba, where they will work in connection with the fleet during its maneuvers there.

Aeroplane Tests Successful.
JANUARY 13, 1913. The aeroplane tests conducted by the war department at Fort Riley came to a close today with unusually successful results.

Lieutenant Thomas De W. Milling, with an observer in an aeroplane, located an infantry train consisting of dummy figures of soldiers, weapons and an infantry escort three minutes after descending. The information was flashed by a battery on the other side of the hill and the train was destroyed at the first volley.

Lieutenant Milling ascended again, with an observer, and by dropping cards, transmitted the range of an enemy to the battery. This experiment also was successful.

Army officers here believe these tests thoroughly demonstrate the practicality of using aeroplanes as a means of directing artillery fire to an invisible enemy.

Divorced From Woman Who Was Indicted for Violating Pension Law

ALBUQUERQUE, N. M., Nov. 13.—Judge Herbert E. Bonville, in the district court here today, granted a decree of absolute divorce to C. T. Shelton of Albuquerque against his wife, who before her marriage was Miss Patricia M. Shaw of San Francisco. The divorce was granted on the ground that she did not know that the woman he had married was under a federal indictment in Vermont, charged with violating the pension laws, when he married her at Las Vegas on October 28, 1909.

The court issued the divorce decree on the ground that the marriage was the result of fraud on the part of the defendant. Mrs. Shelton was arrested in this city March 1, 1910, taken back to Vermont and arraigned on the indictment to which she pleaded guilty. The cause of the prominence of the couple, both here and in the east, the case attracted widespread attention.

COLD CAUSE HEADACHE AND GRIEVOUS BROW Quinine removes the cause. There is only one BROWN'S KIDNEY PILLS for signature of E. A. GROVE.

IF PONY ROLLS OVER THREE TIMES YOU CAN HIT HIM

SAN FRANCISCO, Nov. 13.—If a polo pony rolls over three times, as he has done today on a muddy field, the rider may resent the indignity by striking the pony with his mallet. This was the momentous finding of the San Mateo Polo club today in the case of George Garrity, club man and financier, accused of having broken rule 29 of the American Polo association, which forbids a player striking an adversary or pony with his hands or mallet.

The "honor" of polo is at stake. The club found that Garrity did, then and there roll over said Garrity three times on the muddy field, justifying a liberal construction of rule 29 on Garrity's part in rebuking the pony.

Women's 18 Button Boots \$3.50

Always Sold at \$4.50

Women's button tan boots, made of genuine Russian calf leather. Goodyear welted sole, medium Cuban heels. A dandy boot for easy walking. Fourteen, sixteen and eighteen button patterns, always sold at \$4.50, for the balance of the week. **\$3.50**

REVISE TARIFF NOW, SAYS SEN. MARTIN

Freer Discussion Since the Invitation for Advice by Governor Wilson

WASHINGTON, Nov. 13.—Owing largely to President elect Wilson's invitation that he would be pleased to receive suggestions regarding the desirability of an extra session of congress, there was much freer expression of opinion among senators and members of the house favorable to such a session today than heretofore indulged in.

Among those who pronouncedly advocated an early session was Senator Martin of Virginia, who is the caucus leader of the party in the senate.

"I can see no reason why the performance of the promises of the Democratic party should be delayed nine months," said Senator Martin. "If the legislation promised is wise and of such a nature as to promote the welfare of the people of the country, the sooner it enacted the better."

"Sometimes it is suggested that the Democratic majority in the senate is so narrow and there are such differences of opinion as are likely to prevent the passage of promised legislation. But I am sure these suggestions are without any foundation in fact. I have not the slightest doubt about such harmony and cooperation among Democrats of the senate as will secure the passage through that body of all the legislation promised in the Baltimore platform."

ARREST OF MEXICANS EXPOSES REBEL PLOT

EL PASO, Tex., Nov. 13.—Efforts of the United States military and the Mexican secret service today are directed to prevent developments of a rebel plot to attack Juarez, the Mexican border town and port of entry, so often threatened. The arrests this week here and at San Antonio, Tex., of Col. Pascual Orozco, Sr., and Col. David de la Puente directly resulted from the premature exposure of the rebel plot made known to the war department by Mexican agents here. The arrests are made possible by the "semitraining" law, which exists along the American side of the Mexican frontier.

Military commanders at Fort Bliss and at Juarez are alert. Patrols of American and Mexican troops have been installed on either side of the line. Rebels in apparently small groups are pressing toward Juarez from east to west, but a movement of Mexicans from the American side is most feared by officials. This is evident by the arrest in the United States of General Orozco's father and de la Puente, his chief of staff, who was captured at San Antonio as he was about to come here to take charge of the movement against Juarez from some point in New Mexico, near El Paso.

Organization of the so-called "Political Refugees Protection League." The organization was launched a few days ago at Phoenix, Ariz., with declared intention of forming a fraternity of Mexicans in the United States to defend, morally and materially, refugees from "American soil" for other than criminal offenses. The large Mexican population of the American border states makes complex the problem which the organization assumes such as the American side is most feared by officials. This is evident by the arrest in the United States of General Orozco's father and de la Puente, his chief of staff, who was captured at San Antonio as he was about to come here to take charge of the movement against Juarez from some point in New Mexico, near El Paso.

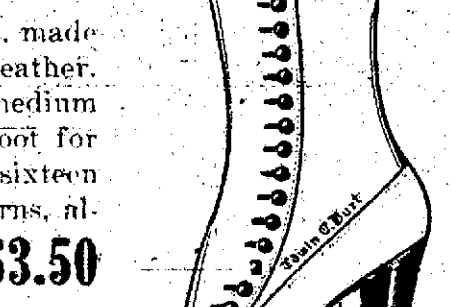

Other Arrests to Follow.
SAN ANTONIO, Tex., Nov. 13.—The arrests of Pascual Orozco, Sr., and David de la Puente, who are detained at Fort Sam Houston, charged with neutrality law violation, constitute the preliminary to the arrest of a score or more which are being planned in the organization of revolutionaries against the Mexican republic, according to a government official here. Arrests will be made, however, only under instructions from Washington, or at the personal direction of Gen. E. Z. Steyer, commander of the department of Texas.

The federal criminal statutes give the army police power in cases where it is alleged that a movement is under way to organize a revolution against a friendly government.

De la Puente was formerly chief of staff in the army of Orozco, Jr., leader of the rebels of northern Mexico.

ANOTHER VICTIM OF STRIKE AT BINGHAM

SALT LAKE CITY, Nov. 13.—Angelo Pessey, whose American name was Harry Spinder, died today from a wound inflicted October 29 by strike competitors who fired a shot at the canon at Bingham at a party given to going to work at the United States mine. The crime was charged to strike pickets and several suspects have been arrested.

Women's 18 Button Boots \$3.50

SOCIALISTS OPPOSE REELECTION GOMPERS

President Rules That There Can Be Only One Union in Single Trade

BOSTON, N. Y., Nov. 13.—As far as the American Federation of Labor is concerned, there is no such organization as the International Association of Steam, Hot Water and Power Fitters and Helpers of America. This declaration was made today by President Gompers, before the convention of the federation, and the convention upheld him when, by a vote of 102 to 21, it refused to seat the delegates of the International association.

The reason given by President Gompers and the delegates who support him is that the United Association of Journeymen Plumbers, Gas Fitters and Steam Fitters Helpers of America, which is affiliated with the federation, takes in members of the steam fitters trade, and it would be contrary to the federation principles to recognize more than one international union to a single trade.

Members of the radical wing of the convention, which included nearly a hundred Socialists, say vigorous opposition will be made to the reelection of President Gompers, and that if he is chosen it will be his last term. Socialists have been trying for years to win the federation over to their principles, but they have stumbled on the opposition of President Gompers to direct political action. The fight is likely to come up next week, when the question of referring the election of officers to a referendum vote of the members is to be taken up.

ANARCHIST QUARTERS SEARCHED FOR CLEW

PARIS, Nov. 12.—The Paris police today searched the anarchist quarters and detained a number of persons suspected of possible connection with Manuel Pardinus, the assassin of the Spanish premier.

Augustin Pardinus, brother of the assassin, lives in Paris and is a rubber maker. He expressed great horror at the crime, and said: "Manuel must have acted in a moment of madness. He was a very good boy. I never knew that he was an anarchist. He left me on November 8, saying that he was going to Bordeaux to embark for America, where he intended to set up in the rubber business, as he knew no opening for him in Paris."

NEW CIVIL SERVICE LAW WOULD LIMIT APPOINTEES

DENVER, Nov. 13.—Approximately 225 state house employees of all ranks, from engineers, chemists, draughtsmen and accountants to janitors and waitresses are awaiting the final counting of the vote on the civil service law, submitted to the people at the election. If this law has passed it will place under the classified service all the employees in the capital building except janitors, messengers and the few professional assistants of the attorney general. If this measure has become a law, Governor-elect Elias Ammons will have scarcely 30 representative positions in the state house to dispose of when he took his office on January 3, as against almost 100 which his predecessors have had at their disposal.

PREMATURE EXPLOSION KILLS 1, WOUNDS ANOTHER

FORT COLLINS, Nov. 12.—Frank Neese was instantly killed and Superintendent James Murphy was painfully injured late today when a defective fuse caused a premature explosion at the Great Western Sugar company's limestone quarries at Englewood.

Neese had just lit a fuse in a drill hole that should have burned for seven minutes when the explosion occurred. A keg and a half of black powder was in the hole and Neese was hurled a hundred feet into the air. Murphy, who was standing some distance away, was knocked down by a large piece of rock.

D. A. C. LAUDS MAJ. BUTTS AND ISADOR STRAUS

WASHINGTON, Nov. 13.—The daughters of the Confederacy in convention today paid tribute to the late Major Archibald W. Butts and Isador Straus, two southerners lost in the Titanic disaster. The annual report of President General Mrs. Alexander B. White lauding the two men was enthusiastically received. The report urged activities in raising funds for the Confederate monument at Arlington and Shiloh and commended on the good feeling between the daughters of the Confederacy and the Women's Relief corps of the Grand Army of the Republic.

FRICTION WITH EMPLOYEES LUMBER MILL CLOSES DOWN

MERRYVILLE, La., Nov. 13.—The plant of the American Lumber company here, employing 1,300 men, was closed down today as a result of friction with the Brotherhood of Timber Workers. The company declined to reinstate employees indicted in connection with the Grabow labor riots.

DYNAMITE TRIAL DELAYED

INDIANAPOLIS, Nov. 12.—Owing to the continued illness of Allen Spaulding, one of the dynamite conspirators, the hearing was postponed until tomorrow.

GUNMEN WILL TAKE STAND IN DEFENSE

State Rests Case—Attorney for Defendants Says Others Are Guilty

NEW YORK, Nov. 13.—The state rested its case tonight in the trial of the four gangsters accused of murdering the gambler, Herman Rosenthal, at the instigation of Charles Becker, and counsel for the gunmen opened for the defense, declaring he would show that none of the four took part in the shooting, or that he was not connected with the plot to kill Rosenthal.

He declared he would show the quarter was fired, to the scene on a pretext, and that the shooting in front of the Metropole, where Rosenthal was killed, was done by "bridge" Webber, Harry Vallon and a mysterious stranger, who was then brought into the case for the first time.

When the prosecution's last witness had testified, Justice Goff denied Mr. Wahle's motion to dismiss the indictment and acquit the defendants.

Outlines Defense.
The lawyer then outlined his defense, after going into a personal history of each of his clients, declaring that, had as their records might be, they were not guilty of the Rosenthal murder. He announced his intention of placing each of the "gunmen" on the stand. He would show that Frank Crofied, one of the four was at home at the time of the shooting. Mr. Wahle declared, and that he was only interested in their friend, the east side gang leader, Jack Zelig, that had brought any of them near the scene of the crime in the early morning of July 16.

The fear of Jack Rose, the informer of Jack Zelig's vengeance growing out of the alleged framing of the gang leader, when he was arrested on a charge of carrying concealed weapons, was the key to such negotiations as took place between the gunmen and Rose, counsel declared. It was represented to his clients, Mr. Wahle said, that Rose, having heard that Zelig suspected him of inspiring the framing, wished to show Zelig's friends that the suspicion was unfounded.

Ask About "Some One Else."
Mr. Wahle said he would be able to discredit the testimony of the identification witnesses, Luban and Krause, and that it would be shown that Shapiro, the chauffeur, had declared he had not seen the faces of the men who rode in the motor car behind him.

The cross-examination of witnesses during the day had indicated that the defense was preparing an attempt to prove that others than the gunmen had killed Rosenthal. This was particularly noticeable in the cross-examination of Jack Rose, who reported in its essentials the testimony of the witnesses at the trial, declaring that the defendants, threatened by Becker with a "framing" on the charge of carrying concealed weapons, agreed to kill Rosenthal.

HOW CUBAN SUGAR TRUST WAS FORMED

NEW YORK, Nov. 13.—Cuba's raw sugar, and what control over its production and sale may rest in the hands of the so-called sugar trust, were discussed in testimony today in the government's dissolution suit. Henry A. Clark, secretary of the Cuban-American Sugar company, since the 1909 trial, declared that the company produced 90 per cent of Cuba's sugar in 1910.

Federal attorneys brought out that a contract existed between B. S. Howell, Howell and company, and the Cuban-American sugar company. When the latter was organized, Mr. Clark testified, the Howell firm, which was the commission house for the "trust" in the United States, was chosen to serve the Cuban-American company.

Mr. Clark promised to produce the contract he mentioned. Horace Havemeyer, James H. Post, Frederick A. Howell and Thomas F. Howell were mentioned by the witnesses as directors of the Cuban company.

SMART APPAREL FOR OUTDOOR SPORTS

Two colors of silk are combined in the Gaby silk sweater so that the garment has a striped effect: cuffs, collar and other trimmings matching the darker color. This sweater has a blue and white striped ground with plain blue trimmings. A blue cap trimmed with white matches the silk sweater, which is warm as toast in addition to its charming lines.

A FINE Deafness Treatment FREE

Do you realize the terrible state which you are in? Do you know what total Deafness means? It means a living death. Shut out from all human life, the world of business and pleasure becomes a fearful blank. Will you suffer this untold misery and loneliness without investigating the best method of treatment?—The method which has restored to hundreds of sufferers their full sense of hearing, quick and accurate speech, and freedom from Deafness. YOU must come before it is too late. Because I have been so successful in curing Deafness, and because my heart aches for my victims, I am going to GIVE A FREE Treatment for Deafness to every sufferer who asks for it. Surely this is a present worth having. Out of my sincere desire to relieve human suffering, I gladly make you this gift. My treatment has cured hundreds of people of the most distressing, wearing deafness, and restored their full hearing. Write for the treatment today, and give me the opportunity to show YOU my successful new method for the treatment of Deafness RIGHT IN YOUR HOME. All I ask is that you will act NOW. Don't hesitate or it may be too late to help you. Write me at once and address upon it, and I will send you the treatment for Deafness. Deafness Specialist, Boston, Mass. 135 Trade Building.

Do your Christmas shopping early. Our stocks are complete.

THURSDAY, NOVEMBER 14, 1912.

PROGRESSIVES MUST UNITE

PROBABLY the most important happening during the coming administration of Woodrow Wilson as president will be the uniting of progressives into one party. There is not now such unity. Possibly a majority of progressives are in the Progressive party; but there are many also in the Democratic party, and even in the Republican party there are not a few real progressives.

Senators Cummins, Kenyon, La Follette, Borah and Works, progressives who still claim allegiance to the Republican party, are said to have determined to secure control of the Republican organization. If the progressives were unable to secure control of the party at the last convention, however, when they were practically a unit in their desire, it is hardly likely they will be able to do so now, when the great majority of progressives have left the party. It is hardly within the limits of possibility, therefore, that the Republican party will become the progressive party of the future.

There remain, then, the Progressive and Democratic parties. There is no question but that the Democratic party, with the president and a majority in both houses of congress, can, if he chooses, become the progressive party. It can adopt as its own the progressive platform upon which Theodore Roosevelt made his splendid fight for election. By so doing the Democratic party would leave the Bull Moose without a leg to stand upon.

But there is not much prospect for such an eventuality. The Democratic party is not homogeneous. It was united in the campaign just closed on the platform, "Win with Wilson," and upon nothing else. It is doubtful if Woodrow Wilson, even if he were the greatest genius in statesmanship the world has ever known, could hold the Democratic party together upon a platform of constructive legislation.

There is but one faint hope of preserving for four years even the seeming homogeneity of the Democratic party. That is in doing so little in the way of legislation that no strife will be engendered. Business prosperity may be so great, in the meantime, that the Democrats might be able to get back into office once more on the old slogan of the Republicans, prosperity.

But even that is extremely doubtful. The people of the United States have progressed since McKinley's administration. Material prosperity alone no longer suffices a majority. They want more—they want prosperity passed around, to adopt Beveridge's phrase. A standpat party, no matter what its name, will not satisfy. There must be progress.

Any effort Woodrow Wilson may make to secure progress—real progress—will meet with bitter opposition from the standpat element of his own party. He can secure the passage of constructive, progressive legislation only by appealing over the heads of the obstructionists, to the people of the nation, regardless of party. And that will result in splitting the Democratic party just as the Republican party has been split into two bitter camps.

With the Democratic party split into progressives and reactionaries it will remain to be seen which faction can hold the party name. When the split comes, as it is almost sure to do, one faction will work with the Progressive party, the other with the old standpat element in the Republican party. And then, at last, all progressives will be united in one party. It matters little what the name may be; the main thing is to have all men who think alike working together in one party for the same things.

Meantime the duty of Progressives is clear. It is to heed the admonition of Theodore Roosevelt: "If either of the old parties will endeavor to put into legislation any one of our planks it can count upon our hearty support in so doing; but we will not rest contented until the entire platform is enacted into law and becomes part of our political system, national and state."

The Progressive party was formed, not simply to create a new party, but to secure progressive legislation. And members of the new party will work shoulder to

shoulder with either Democrats or Republicans who shall enlist in the fight for such legislation as the Progressive party demands and as the country needs.

ANOTHER ASSASSINATION

AGAIN has the hand of the assassin struck down a great world figure, and again without in the slightest benefiting the condition of a single man, woman or child on earth. Premier Canalejas of Spain was one of the most liberal and progressive men who ever guided Spain's government. He it was who headed the movement to limit the authority of the church over the Spanish government. He had done more for progress in Spain than any other official of recent years.

The mere fact that General Weyler, the "butcher" of Cuba, is mentioned as the likely successor of Canalejas, shows how little the assassin's bullets accomplished. The hands of the clock are usually turned back after every assassination. Probably never in a civilized nation at least, has assassination made for progress. Almost always it leads to a reaction.

And yet, in spite of this, there are to be found in increasing numbers men whose crazed brains imagine that by killing the head of the government they can accomplish something for the benefit of humanity. And there is no earthly protection against such assassins. Assassination, evidently, is one of the risks that every man must assume who occupies a high place in government.

A GOOD EXAMPLE

IN Illinois the Progressives will hold the balance of power in the coming legislature. Already the legislators-elect have met with prominent men of the party, and are at work on a program of legislation which will be introduced and supported by them.

In Colorado the Progressives will not hold the balance of power in the legislature. That body is overwhelmingly Democratic. Nevertheless there will be in both senate and house a minority of Progressives, and they ought to follow the example of their Illinois brethren and map out before the legislature convenes a course of action to be followed throughout the coming session.

Only by so doing can Colorado Progressives hope to educate the people of the state in Progressive doctrines, and prove to them the superiority of the Progressive party over both the old parties.

PROSPERITY

TWO significant items of the day's news:

Building permits in Colorado Springs for October, 1912, increased 194 per cent over October, 1911, this city ranking fourth in the United States in percentage of increase.

Gross earnings of the Denver & Rio Grande for October, 1912, increased 12.1 per cent over the same month last year, while operating expenses decreased, making an increase in net earnings of 61 per cent for October, 1912, over October, 1911.

AN APPRECIATION

To the Editor of The Gazette:
I wish once more to express my gratitude to you for publishing Pastor Russell's sermons in your paper. They certainly express Bible truths. I know of at least 12 others who appreciate it not less than myself, and we hope you will continue to publish same indefinitely. Please accept my best wishes for continued success.

MRS. LOUIS E. ASHBY.

Colorado Springs, November 13, 1912.

HEROISM AT M. W. A. SANATORIUM FIRE.

To the Editor of The Gazette:
I enclose a short account concerning an act of heroism performed here, when the Modern Woodmen sanatorium was threatened by fire, and which I hope you will publish:

Between 5 and 6 o'clock Saturday morning, the incense-burning room at the M. W. A. sanatorium caught fire, and was gaining great headway, when discovered and the alarm given. But for the bravery and presence of mind of a certain unnamed gentleman, the entire building would have been a smoldering ruin at this time. The said hero, at the first intimation of a fire, ran, half-dressed, from his tent, and rushed to the top of the burning building, and, with the aid and assistance rendered him by another employee, whose name I will not divulge, extinguished the fire before any serious damage had been wrought. We are very glad that Mr. Genicks had the presence of mind to risk his life in the saving of a building constructed for so good a cause. We also are very glad that the hero who won such glory came from Mrs. Storty's department.

KENNETH M. HUGH.

Woodmen, Colo., Nov. 12, 1912.

AMERICA'S BIG TASKS.

To the Editor of The Gazette:
"The White Man's Burden" is with us right here in America. We are, or ought to be, under it. As Atlas was under the globe in the interest of our own preservation as a nation.

A great Protestant organization is just now engaged in a campaign of education to bring to the attention of American patriots the great tasks that need to be undertaken right away. This organization is the Home Missions council, composed of 27 boards, engaged in national home mission work, and the Council of Women for Home Missions, made up of nine women's boards, representing a church membership of 20,000,000.

Regarding this home mission educational campaign, the Ladies Home Journal says: "The American home mission enterprise, as represented in the various mission boards of our country, is one of the biggest, broadest, bravest movements in the United States, because it stands for the physical, social, economic, intellectual, and re-

ligious welfare of all the people. Home Mission work is an attempt to impress upon every man and woman of the country the supreme importance of saving America for the Kingdom of God through the established agencies of the church. It will be the culmination of a campaign of education through the use of literature, the press, study classes, and conferences."

Every American citizen worth the name is interested in saving America. And the big political problems are moral problems as well. There is a great big "Right" and a great big "Wrong" not far away from each one of these problems. That is why every citizen, irrespective of church affiliation, as well as every citizen of no church affiliation, should feel responsible to the extent of his ability and opportunity for bringing about the wisest and best solution of these far-reaching questions.

As a part of the nation-wide educational campaign six union meetings will be held in six churches of Colorado Springs on the evening of Saturday, November 24. Topics of vital interest to the church and the nation will be discussed by selected speakers, men and women. The programs in detail will be published next week.

JOHN Y. SWART,
Committee Chairman.
Colorado Springs, November 13.

HOW THE EARTH WAS MADE.

From the Kansas City Star.

Nervous persons used to be a good deal disturbed, and perhaps they are still, by the reflection that the earth is a fiery, molten ball, covered with a thin crust. Such a crust might some day collapse with exceedingly unpleasant consequences.

But the idea of this sort of thing is always subject to revision and in the last few years geologists have largely abandoned their old notions of the makeup of the earth.

The supposition had been that the earth was thrown off from an incandescent nebula that it formerly was a mass of fiery vapor, and that gradually it cooled to its present state, with a solid crust confining the blazing mass within. For many years this theory seemed to account for all the facts with entire precision. Then some disquieting considerations arose. If the earth has gradually cooled from an incandescent state, the oldest rocks of which geologists can find a trace should prove to be one of intense heat. It had been supposed that the sheets of granite found in various places furnished this evidence, for granite is a fire-made rock.

Later investigations, however, proved that there was older rock than granite. It gradually accumulated under the influence of wind and rain and it contained the prints made by raindrops of those far-off times which are not different from the prints of raindrops made today. The climate could not have been very different from that of the present age. Remains of coral reefs are found in some of the more recent deposits in the British Isles, thus indicating the existence of a tropical climate, but they are absent from the oldest deposits. So there has been no uniform cooling in that region. At the time of most luxuriant vegetation in the northern hemisphere, and in parts of India, evidently the earth has not gradually reached its present temperature from one much hotter.

All of this was perplexing, and then the mathematicians got busy, and proved that there were mathematical difficulties in the way of the formation of the earth according to the old theory.

In the midst of these perplexities came two Chicago university professors, Chamberlin and Moulton, with the suggestion that if the nebula were composed not of incandescent gas, but of small particles of matter in rapid motion, the difficulties could be met. These particles striking against each other would produce the glow of the nebula, and their gradual accumulation in a mass would build up planets like this world. This theory has been grasped by geologists and astronomers generally.

It is believed that these particles were cold, and the mass which they built up was relatively cool. The enormous pressure toward the center, however, accompanied by the gradual contraction due to the force of gravity, would produce the heat in the interior of the earth that accounts for volcanic action.

It isn't an icy mass of rock and metal that underlies this crust on which we live. But at least it isn't the roaring furnace of the old geologists.

Too Much Pessimism

By RUTH CAMERON.

A young girl bred in a small, suburban village, recently married a man from a large city, and came to his home to live.

Of course, there were many things in the new environment which surprised and interested her, and it was a pleasure to hear her naive comments, but the one comment which interested her far above all the others was this: "This country is so big, and I have met here are always talking about how, to keep one's husband faithful, as if that were the chief problem a woman had to worry about. Why, in my home a woman's chief problems were finances and children and making a comfortable home, and things like that. The women in our town were true to their husbands and expected as much of them. There were one or two men that people said went around with other women, but that was considered a terrible disgrace. We never expected it to happen right in our own families the way you do here."

Seems to me that the little country mouse has struck a note that needed to be sounded. In the last 10 or 15 years women's eyes have been opened. They have ceased to be the blind and trusting wives, mothers and sisters they used to be. And that I think is well. But is it not possible that some of us have opened our eyes altogether too wide, and are seeing a much more gloomy state of affairs than really exists?

A young married woman asserted to me that she did not believe that more than 25 per cent of married men were faithful to their wives. What nonsense! There may be a so-called upper class of society in which that is true, but it is not true of the middle class, the middle class, the people you and I know.

To hold one's husband's romantic love, to keep him always a sweetheart, that is indeed a problem and one that few women are capable of solving. But to keep a husband faithful! I don't think that's a problem that the average woman—or should I say the wife of the average man—needs to worry about, unless she gets into the I've-got-it-and-so-it-doesn't-matter-how-I-dress-and-act attitude.

To be sure, married life isn't all on the heights, isn't all smooth sailing, but then neither is any condition of life. When married people aren't happy they are likely to think it is because they are married. It's more apt to be just because they are themselves and because they are living in an ordinary old world, where there is always more or less to trouble and annoy. Half the time when we think our problem is "How to be happy though married," it's simply "How to be happy though human."

Let's not make the mistake of being cynical and pessimistic about marriage and the relations, just because we have acquired a little knowledge. It really doesn't pay.

L'avements

By GEORGE FITCH,
Author of "At Good Old Bismarck"

A pavement is a brick roof over a mud puddle. Sometimes it is made out of asphalt, but then it usually isn't a pavement—it is a scandal.

Pavements are laid in order that teams may drive over the street without getting into the mud up to the drivers' necks. They also enable automobiles to travel with greater rapidity. A good automobile with a bad chauffeur can travel over a fair pavement at a rate of 70 miles an hour. People having children and wishing to retain them intact should live on a street with a very bad pavement.

Pavement is laid by contractors, and costs the property owners about \$4 a foot. If the city government has been cleaned up recently, there are a few things more irritating than to sit on one's front porch and watch the automobiles fit merrily over your brand new pavement for which you have just paid \$200 by the simple process of walking in order to save carfare.

It takes about a week to lay a block of pavement. After that it takes about a week to yank a strip of it up to lay a water main and another month to take it up and pile in on the curbing while the street car line is being revamped, and another month to dig a trench through it to install a new sewer, and almost three months to slice it up here and there for water connections, gas pipes, conduits, mail tubes and other connections. After a pavement has been taken up and laid down for about six months it generally gives up as a pavement and starts in business as a steeplechase course.

Pavement would last 20 years if honestly laid by men who will go to heaven when they die. But most pavements last about five years.

IF THIS IS YOUR BIRTHDAY

Illness threatens you. Be sure to take the right way to keep well. Good fortune in money matters is in store for you.

Those born today will be natural, voluble and passionate, but superior to their kind. Their natural attractiveness and their natural ability to get on with people will gain them the friends necessary to success.

SOCIALIZING SCHOOLS IN COLORADO

From the Survey.

If Ben Lindsey has his way, Colorado will probably be the first state to provide social centers by name in its constitution. At the next general election in November, the voters are to pass upon the proposition of the Direct Legislation League for placing the playgrounds, recreation, neighborhood and social centers, public baths, public libraries and schools under the same authority. The proposed amendment also provides that, except during school hours, school houses shall be open to the people for discussion of public questions concerning their civic, social, business and political affairs. At present the conduct and business of the schools are regulated and controlled by general state statutes.

In order to facilitate the wider use of the schools by the people of the cities the league has included in the proposed amendment a provision for children's social centers. The arguments used by Judge Lindsey and his coworkers to support the change are that by combining the playgrounds, libraries, public baths, social centers and schools under the same governing board conflicts, such as now exist in Denver between the park board and the school board, would cease. Service would be coordinated and would cost less, because duplication of plant and employees would be prevented. An advance indication of the way the people are likely to vote has already been given. At the last municipal election in Denver the people defeated by 10,000 majority a proposed amendment to the city charter to create a fixed board to take over the playgrounds, largely because it interfered with the plan for centralization.

WILD APPLES OF EUROPE AND AMERICA

From the Ave Maria.

There are two varieties of apples found wild in Europe, but the apple known in the east probably originated in the region near the Caspian sea. Among the heads of refuse left by the Lake Dwellers who occupied Europe before any of the present races charred pieces of apple have been found.

In America there were five types of native apples, all crab apples. Capt. John Smith wrote from Virginia to England that the apples were "small and bitter." From these poor little apples the splendid ones of today have been produced by cultivation.

100 more of the little tooled leather shopping lists go on sale today.

Hardy's
16 N. Tejon

We Are Ready for Christmas

THIRTY YEARS AGO TODAY

November 14, 1882.
New telephone poles were being set on Tejon street.

Rev. Dr. T. C. Kirkwood was given a donation party at the parsonage of the Presbyterian church.

August Wehrle, the well-known piano tuner, was in the city tuning and repairing pianos.

TWENTY YEARS AGO TODAY

November 14, 1892.
Locke Richardson gave a reading of

Shakespeare's "Henry IV." at Antlers, for the benefit of the kindergarten.

Prof. E. S. Parsons of Colorado college read an interesting paper, "Christianity and Socialism," before the Monday Evening club of the Presbyterian church.

The Order of the Eastern Star held a meeting and entertainment to celebrate its first anniversary.

W. P. Bonbright and D. V. Doherty bought the building on Dodge avenue occupied by the Shields-Mor Grocery company, from John Orr.

THE HASKIN LETTER THE PARENT-TEACHER ASSOCIATIONS.

By FREDERIC J. HASKIN.

The eyes of those interested in different branches of child welfare work are now turning to Houston, Tex., where, under the joint auspices of the National Congress of Mothers, the Parent-Teacher associations and several local organizations, a conference is being held for the consideration of many matters pertaining to the well-being of the children of the nation. The Parent-Teacher organization, rapidly growing up in different parts of the country, are the outgrowth of the work of the Congress of Mothers and have for their object a closer cooperation between teachers and parents for the improvement of every condition which in any way affects the comfort and progress of school children. Consequently, in its membership school superintendents, members of the boards of education, legislators and public officials, as well as the parents and teachers who are primarily responsible for its organization.

In Rutland, Vt., one of the problems confronting the organization is the securing of some means of consolidating poorly equipped schools having a small attendance. In order that the children may have better advantages, a school director reported the existence of two schools, the two serving only 25 pupils, but each requiring the services of a teacher receiving \$225 a year. The school rooms were unattractive without maps, globes and other essentials. These two schools could be combined and a better teacher secured for \$450 a year, and the saving in the expense of heating and keeping two buildings in order might pay for the transportation of the children to one school, as the two buildings are less than two miles apart. It happens, however, that the schools rely upon state aid for their support and the apportionment of state money is based upon the number of schools in a given town, so that it receives more for two schools of 12 pupils each than it would for one school of 25 or more pupils, having a better paid teacher and better school equipment.

There are other localities where similar conditions prevail and the attention of the Parent-Teacher associations is now being given toward securing state laws which will proportion the school fund upon the basis of the number of pupils to be cared for in such manner as to secure the best possible advantages for all.

Attention to Highways.
The conditions of the roads have always a most important bearing upon the attendance of the public schools in rural localities. Therefore, an improvement of the highways is an improvement upon which many local organizations of parents and teachers are now concentrating their efforts.

The securing of proper breakfasts for children between the ages of 12 years of age is a subject which interests both teachers and parents since children do not do their best mental work unless they begin their day with proper nourishment. At a child welfare exhibit recently held in Buffalo, there was a cooked food exhibit under the joint auspices of the teachers and mothers' clubs. The food was prepared by the domestic science department of a nearby public school. The comparative value of foods in bulk and in packages was an eye-opener to many who had not before counted the cost. Screens, showing the photographs of healthy, properly fed children, were shown, together with charts giving the food value of eggs and milk and their equivalent in cereals and meat, as well as the poisons found in many prepared foods and highly colored candies.

The question of supplying a school breakfast to children who come to school without having had food in the morning, is a problem before a number of Parent-Teacher organizations in some of the congested sections of the cities. In a number of places provision has been made through private charity for supplying the breakfastless child with food. At the same time an effort is being made to reach the mothers and interest them in some different means of provision. When the cause is poverty, help is secured from the proper channels, but when, as is often the case, a child is allowed to go to school without breakfast simply through the carelessness of the mother, who may perhaps give him two or three pennies to buy cakes as a sub-

stitute, the organization endeavors to arouse in her a feeling of greater responsibility, and much good has already been accomplished in this direction. Cooking classes and mothers' clubs have wrought wonder in many school communities and are always brought about by and cooperation between the teachers and mothers as the Parent-Teacher association endeavors to promote.

Look After Food Supply.
In Milwaukee, the attention given to the food supply of school children called for the expenditure of \$2,000 last year. Between November and March 5,000 loaves of bread, 2 dozen rolls and 300 quarts of milk were used. The cost of a child's lunch about 4 cents. The child is charged if he fails to pay, thus eliminating the idea of charity. The balance paid by the organization having matter in charge. These lunches to meet the urgent demand for food and are distributed through 100 school children for 2 cents. What their present value is not disputed. Parent-Teacher associations are working to secure better home conditions, that these outside agencies will be longer required.

In a number of states the members of the Parent-Teacher associations, both men and women, are giving their heartiest efforts towards the abolition of many forms of social evil. The possibilities of giving a proper course of instruction in sex hygiene in the public schools is being thoroughly discussed with the usual consensus of opinion that such matters must be dealt with by the parents, not by parents. In a number of instances fathers' clubs, as well as mothers' clubs, have been the outgrowth of a campaign upon this subject. The prohibition of the distribution of obscene cards is one of the matters in which a number of the organizations in western and southern states are turning their attention.

Among the school improvement movement is leading activity and one in which cooperation of parents of different social classes are asked to meet upon a plane of mutual interest. The need increased social relations between foreign and American-born parents, the benefit of the children of both, one of the newer ideas which it is going to play an important part in the future of the nation. It is a source of great difficulty in our communities. The public school, long to all and the opinion of every parent as to what measures are conducive to the best development of own child are worthy of fair consideration.

Vital-Civic Forces.
Among the matters to be taken by the conference now in session, attention is being given to the vital-civic forces affecting the nation and the child. This includes laws upon compulsory education, child labor, juvenile crime and several other subjects. Reports from the different states will be considered and one of the speakers will be Dr. Julia Lathrop, the head of the child's bureau. The differences existing in the different states regarding these matters seem to indicate the need of certain federal legislation, although the peculiar conditions of different parts of the country in the midst of many persons, call for laws fitted, especially to local needs.

A dominant note in the platform of every organization devoted to child welfare is the need of greater recognition of the duties and responsibilities of parenthood and the fact that much of the neglect which is apparent in condition of thousands of American children is due to the fact that the mothers are not fitted for the duty which have devolved upon them. The Mississippi Congress of Mothers a Parent-Teacher associations have recently issued a statement of its attitude in which it says: "We stand for educated parenthood and plead for the establishment of a chair of motherhood in every college and high school in the country."

In many of the states the Parent-Teacher association is the vital force of the community. Under the encouragement of the state education board, these organizations exist in connection with hundreds of schools.

SCHLACKS RETIRES FROM RIO GRANDE

DENVER, Nov. 10.—Charles H. Schlacks retired as vice president of the Denver & Rio Grande railroad at a meeting of the directors held in New York last Thursday. The office held by Mr. Schlacks will remain vacant and there will in the future be only one vice president for the company. E. L. Brown was re-elected to that office.

Joel P. Miller, general counsel and director; E. L. Brown, vice president and director; and Benjamin F. Bush, president and director, were all present at the meeting. All the old officials, with the exception of Mr. Schlacks, were re-elected.

The directors took up for discussion plans for the coming year, which include the preparation of the 1913 budget. It probably will be some time before the budget is finally made up, but it is understood that it will include appropriations for numerous improvements to cost between \$5,000,000 and \$10,000,000. These include the continuation of the double-track work, which was commenced this year; the standard-gauging of the Salida-Montrose line; the enlargement of shops at a number of points; and the purchase of additional equipment.

There has been some doubt in the public mind for a year as to the relations of Vice President Schlacks to the Denver & Rio Grande. His name is an official was dropped a year ago from the official railway guide and was never reinserted. He was, however, selected a director at the recent annual meeting in this city and his name

continued to appear in the annual report as vice president.

It was definitely determined as a result of last Thursday's meeting, however, that he is no longer an official of the company. It is understood that Mr. Schlacks informed the president some time ago that he wished to be relieved of the duties of the office so he could give all his time to the Western Pacific, of which he is vice president.

FARM BOYS PHYSICALLY INFERIOR, SAYS INSTRUCTOR

COLUMBIA, Mo., Nov. 10.—Mr. J. F. Field, instructor in physical education at the University of Missouri, has been lecturing to the students from classes in agriculture. He today opened a class especially planned for the physical development of farmer boys.

SEARCH IS BEGUN FOR FRENCH CRUISER FLEURIS

PARIS, Nov. 10.—A torpedo destroyer has been sent to search for the obsolete French cruiser Fleuris, which broke adrift in a storm from the gunboat that towed her between Lorient and Rochefort. Fifteen men are aboard the cruiser.

U. S. SUPREME COURT VISITS PRESIDENT TAFT

WASHINGTON, Nov. 10.—The supreme court paid its annual fall visit today to the president of the United States. President Taft with his personal aide, Major T. L. Rhodes, received the justices in the blue room of the White house.

DENVER TO PROPOSE BOND ISSUE BUILD THE MOFFAT TUNNEL

DENVER, Nov. 10.—When Newman Edwards, in Denver next Sunday or Monday the proprietor of the Denver member of committee that the city of Denver build the Moffat road tunnel will be presented to the city.

It is understood that Mr. Edwards has said that he has no choice between the city and the state as to which builds the tunnel. He is said to have been much gratified at the majority given the tunnel bill in Denver and to be inclined to permit the city to bond itself to do the work if it wants to do so.

President Edward J. Yetter of the chamber of commerce, according to telegraphic reports, today greeted enthusiastically in Salt Lake City in favor of the building of the tunnel yesterday. The commercial club of the city capital and other similar organizations throughout the state are said to be heartily in favor of lending substantial financial aid in the construction of the tunnel. Yetter brought the subject up at the good roads meeting at Salt Lake City last night.

Actual work of extending the road west from Steamboat Springs, its present western terminus, began yesterday when a grading outfit began operations. The general contract will be let November 18 in New York to the lowest bidder and it is said that approximately \$2,000,000 worth of work will be given out at that time.

SPRECKELS LEAVES FOR LOS ANGELES

SAN FRANCISCO, Nov. 10.—Rolloph Spreckels, president of the Western Republican League of California, and who recently offered a reward of \$5,000 for evidence leading to the conviction of any person of fraud in connection with last week's election and L. A. Day, chairman of the League, today left for Los Angeles to attend the annual convention of the league.

"I do not care to make a declaration," said Mr. Spreckels, "as to whether or not in my opinion any improper or fraudulent methods have been used during the election, or subsequent to the election, in the city of Los Angeles. My purpose in going there is to satisfy myself as to conditions, and I promise that if any evidence is shown to show fraud in connection with the election, and will back up my efforts to punish any who may be found to be implicated in it, if it is possible."

PRESIDENT PA. RY. RESIGNS

PHILADELPHIA, Nov. 10.—James McCrea, president of the Pennsylvania railroad, resigned today to take effect January 1.

The resignation was presented at a special meeting of the board of directors. The directors immediately elected Samuel Rea to the position.

Mr. Rea has for years served as vice president.

Household Economy

How to Have the Best Cough Syrup and Save \$2. by Making It at Home.

Cough medicines, as a rule, contain a large quantity of plain syrup. If you take one pint of granulated sugar and 1/2 pint of warm water and stir about 2 minutes, you have as good syrup as money could buy.

If you will then put 2 1/2 ounces of Pinex (50 cents worth) in a pint bottle, and fill it up with the Sugar Syrup, you will have as much cough syrup as you could buy ready made for \$2.50. It keeps perfectly.

And you will find it the best cough syrup you ever used, even in whooping cough. You can feel it take hold—usually stops the most severe cough in 24 hours. It is just laxative enough, has a good tonic effect, and taste is pleasant. Take a teaspoonful every one, two or three hours.

It is a splendid remedy, too, for whooping cough, croup, hoarseness, asthma, chest pains, etc.

Pinex is the most valuable concentrated compound of Norway white pine extract, rich in quaiacol and all the healing pine elements. No other preparation will work in this formula.

This recipe for making cough remedy with Pinex and Sugar Syrup is now used and prized in thousands of homes in the United States and Canada. The plan has often been imitated but never successfully.

A guarantee of absolute satisfaction or money promptly refunded, goes with this recipe. Your druggist has Pinex, or will get it for you. If not, send to The Pinex Co., Ft. Wayne, Ind.

Colorado City DEPARTMENT OFFICIAL CANVASS ON VOTE FOR CITY CHARTER

The official count of the canvass on the proposition to amend the city charter will give the following figures:

	For	Against
Proposed 1	265	128
Proposed 2	113	51
Proposed 3	131	71
Proposed 4	56	63
Proposed 5	54	28
Proposed 6	621	256
Majority for charter	271	

The vote on the alternative measure of amending the city into two wards follows:

	For	Against
Proposed 1	122	125
Proposed 2	52	51
Proposed 3	59	61
Proposed 4	38	67
Proposed 5	28	31
Total	295	334
Majority against	35	

At a meeting of the council next Monday night the date will be named for the election of 21 delegates to a charter convention.

A meeting of the teachers of the city schools at 8 o'clock tomorrow evening Dr. Samuel A. Lough will speak on "Moral Education in School and Community." The high school will provide special music.

A Thanksgiving dinner will be given in the R. P. hall by the Ladies circle of the G. A. R.

The Woman's guild of the Church of the Good Shepherd will meet at 2:30 o'clock this afternoon at the home of Mrs. Fred Carpenter, 325 Washington avenue.

A blaze in William Johnson's wood pile on the west side gave the fire department its first run in several days Tuesday. Little damage was done.

THE CAMERA AS A DETECTIVE

From the Kansas City Star.

Each year shows an increasing employment of photography in the detection of crime. There is reported from Tulsa, Okla., a diamond theft in which the camera played a part. A policeman following up the articles of the native newspaper suggested that an X-ray photograph be taken of a diamond ring. The X-ray revealed the hidden diamond. By a trick which Hinton Jones, the Tulsa burglar, had used previously, the diamond had been swallowed by the thief.

Not so long ago a detective that smuglers in the Argentine Republic were passing a box through the mails and the box was found to contain a large quantity of diamonds. The diamonds were found in a box of soap. The soap was found to be a brand of soap which Hinton Jones, the Tulsa burglar, had used previously. The diamonds had been swallowed by the thief.

AVIATOR FINDS ONE NERVOUS WOMAN WHO WILL ACCOMPANY HIM ON RECORD-BREAKING FLIGHT. (MRS. ISABELLA PATTERSON AND HARRY BINGHAM, SEATED IN BIPLANE IN WHICH THEY WILL ATTEMPT TO BREAK THE ALTITUDE RECORD.)

Large sum was saved to the customs revenue.

A man taking long distance views from one of the upper windows of a very tall building in Buffalo caught the picture of a passing express wagon with a man behind in the act of lifting a large package from the wagon. The thief got away with his booty unnoticed by the driver or anyone on the street, but the photograph when sufficiently enlarged identified and convicted him.

A marine vessel taken by a passenger on a foreign steamer in the harbor of Rio de Janeiro included a small yacht. Tow men just gone out in the yacht that morning. Only one returned alive. He said that his companion had fallen from a mast and been drowned, but his story was not believed. He was tried and convicted as a murderer. The trial had been fully reported in the papers, and one day it occurred to the photographer to apply a powerful glass to his picture in order to discover the character of a small, dark mark on the sail. Under the magnifier the spot on the sail proved to be the figure of a falling man. The photographer reported his discovery, with the result that as soon as it had been officially verified the convicted man was released.

At the last meeting of the Lowell (Mass.) city council an order was passed appropriating \$18,000 for the purchase of three motor chemical engines and hose wagons for the fire department to add to the motor equipment.

CRIPPLE CREEK MINES

DRIFTING TO CATCH
MABEL M. FLAT VEIN

Special to The Gazette.
CRIPPLE CREEK, Nov. 13.—Edison and his team, on the Raven and Bonanza drifts, today toward the Mabel M. property, where they hope to encounter the famous flat vein of this country. They have already drifted 250 feet in this direction, and believe that there are about 100 feet more to go before they can encounter this stock.

They are working with all possible speed, and will remove two shafts on the property. This flat vein runs east of the Mabel M. shaft and corresponds with the

STRIKE RICH ORE IN
DAVENPORT SHAFT

Special to The Gazette.
CRIPPLE CREEK, Nov. 13.—While drifting a drift on the bottom level of the Davenport shaft, the Kelly Exploration company has encountered an extremely rich lot of ore which gives promise of lasting for some time to come. Following the Southland and Kelly vein on this property in a drift about 100 feet south of the shaft, they came upon the ore which should turn out to be an enormous one from all indications.

Brain samples taken from the ore which has been opened up have run \$30 to the ton and others have some much higher. The Kelly company will open it up immediately to determine the exact value of the property.

TAKE OUT SAME NUMBER
CARS MONTHLY FOR YEARS

Special to The Gazette.
CRIPPLE CREEK, Nov. 13.—From the Northern mine, on the hill, leased by William Pitts, the output in 1911 was about 500 cars, and the grade of the ore was better than the general run of ore shipped from this camp.

There is one large hole in the mine which has been working a number of years, and has taken out about five or six cars a month from it during that time.

All the while it has produced a complete course of development work, and the claim has been made a thorough trip over the mine, and is ranked among the most important ones.

CONTRACTORS START WORK
ON MASTERPIECE TUNNEL

Special to The Gazette.
CRIPPLE CREEK, Nov. 13.—The contractors who have charge of the Masterpiece tunnel, have started work on the project. They will drill the tunnel about 100 feet from the entrance of the mine, and will cross at the bottom.

The Masterpiece tunnel, which is a large tunnel on the hill, is at the bottom of the mine, and is the only one of the kind in this country. Some good assays have been taken here.

PRODUCTION PHARMACIST
REMAINS UNCHANGED

Special to The Gazette.
CRIPPLE CREEK, Nov. 13.—Some ore is being shipped at the present time from the Cripple Creek mine, on the hill, by Lessee Charles Mathis, who has been working this property for more than a year. The ore is being shipped to the mill, and is being used for the production of the mine. The output last month was 100 cars, while the grade of ore is of the highest class.

There is another lease working on the surface of the mine, following a strike.

START ELECTRIC PUMPS
IN GOLDEN CYCLE SOON

Special to The Gazette.
CRIPPLE CREEK, Nov. 13.—The electric pumps in the Golden Cycle shaft will be started up soon according to present indications, as the whole work of installation has been completed.

These pumps, being the first electric pumps of this kind installed in the district, will lift the water from the 1,600-foot level to the 200-foot level.

NEW YORK MARKET

NEW YORK, Nov. 13.—Extreme dullness continued today's stock market. Price changes were irregular for the greater part, with a steeper time in the final hour, when best prices of the day were recorded. Trading fell from a professional character, but even that faction seemed averse to taking on new commitments.

There were no developments to account for the market's apathy, other than prevailing political and financial conditions.

In the early part of the session there were signs of pressure upon such leaders as United States Steel, American Sugar, United Fruit, and American Tobacco. The market, however, was not affected, and a sharp decline in the market was associated with the decline in the market.

The low, protracted gains of the day were limited to some of the higher priced specialties, such as Woolworth, Sears Roebuck and National Cash Register. The latter group was accompanied by rumors of a slight decline in prices for the metal.

Market conditions were unchanged, although all being did not get beyond the bond market was devoid of special interest.

United States Steel, 3,000,000. United States bonds were unchanged.

Quotations Furnished by Oils & Co.

IRST APPLICATION OF SIMPLE REMEDY DARKENS GRAY HAIR

You don't have to have gray hair or faded hair if you don't want to. Why look old or unattractive? If your hair is gray or faded, you can change it easily, quickly and effectively by using **Woolley's Sore and Scalp Hair Remedy**. Apply a little tonight, and in the morning you will be agreeably surprised at the results from a single application. The gray hairs will become companionable, and after a few more applications will be restored to natural color.

Woolley's Sore and Scalp Hair Remedy removes dandruff, leaves the scalp clean and healthy, and promotes the growth of the hair. It is a clean, wholesome dressing which may be used any time with perfect safety.

Get a fifty cent bottle from your druggist today, and see how quickly it will restore the youthful color and beauty of your hair and remove the gray dandruff, not only scalp and falling hair. All druggists sell it under guarantee that the money will be refunded if you are not satisfied after the trial. Agents, Robinson Drug Co., Advertisement.

Societies and Clubs

The young ladies of the Royal Neighbor lodge will give a social dance and progressive high five party Tuesday night at Modern Woodmen hall. Music will be furnished by Fink's orchestra.

Kir Carson circle No. 9, Ladies of the G. A. R., will meet in regular session at 2 o'clock tomorrow afternoon in G. A. R. hall. Visiting members are welcome.

The Ladies of the Modern Maccabees will meet in Old Fellows hall at 2:30 o'clock this afternoon to practice initiatory work.

The Willing Workers sale for the church building fund will be held at the church, Swedish Lutheran church, located on Pike street between Spruce and Pine streets, tomorrow evening. Instead of this evening.

The executive board of the Woman's club will meet at 10 o'clock this morning at the Alta Vista hotel.

The Ladies Aid society of St. Paul's Methodist church will meet at 2 o'clock this afternoon at the home of Mrs. Phyllis, 321 East Pike's Peak avenue. All members are urged to attend.

Section 2 of the First Methodist church will meet at 2:30 o'clock this afternoon with Mrs. W. J. Pring, 407 North Nevada avenue. All women of the church and their friends are welcome.

The Brotherhood of American Yeomen will give a progressive high five party in M. W. A. hall tonight. The public is invited.

The Woman's Building society of the Boulder Street Presbyterian church will meet at 2 o'clock this afternoon at the home of Mrs. MacDougal, 508 East Boulder street.

The Fraternal Bankers Reserve society will give a Puritan dance tonight in Columbian hall.

The R. P. L. S. Five Hundred club will meet this afternoon at 2:15 o'clock with Mrs. Harry Gelsdorf, 118 East Yampa street.

News of Local Courts

Mary Pease and Ann F. Allison, accused of stealing coal in the Santa Fe roads, will appear before justice tomorrow morning on a charge of petty larceny.

A Schone, a visitor from Wisconsin, living at 615 North Cascade avenue, paid a fine of \$7.50 today for today for running his automobile with the muffler open. He was arrested a few moments after he had procured a license from the city clerk.

The Hemenway Grocery company yesterday filed suit in the district court against L. C. Collins and Henry Baker of the firm of Collins & Baker. Judgment was entered on a claim of \$45.41, \$50 attorney's fees and \$13.57 for second cause of action.

Direct information has been filed in the district court charging Mrs. Ted R. Hill and Mrs. Cora Harper with breaking into the home of Mrs. D. Loring, near Ramah, and taking articles valued at \$48. A deputy sheriff left yesterday for Ramah to make the arrests.

Deaths and Funerals

The body of Henry Boller, formerly of this city, who died Sunday in Hillsboro, Ill., will be brought here today. Funeral arrangements will be made later.

The funeral of Mrs. Byrd Schlein was held yesterday afternoon from the home of her parents, Mr. and Mrs. A. G. Smith, 515 North Weber street. Interment was in Evergreen cemetery.

GALVESTON'S GREAT CAUSEWAY

From the Portland Telegram: On the night of September 8, 1905, Galveston was almost swept off the map by possibly the fiercest tidal wave ever experienced on the Gulf coast. When the storm subsided the little city of about 35,000 people had sustained a loss in property of more than \$17,000,000, while the death toll to the storm king exceeded 8,000 lives. Never before had any American city sustained such a calamity. Possibly a tenth of its entire wealth and a little less than a fifth of its population had perished in a single night.

The task set for the Galveston people was of terrific character; first, to survive and recover; second, to prevent another disaster of that kind. In the second consideration was involved the building of a seawall approximately 6 1/2 feet high and 10 feet long, and raising the grade of the entire city from eight feet above mean tide on the bad side to 17 feet at the seawall and finally the building of a causeway from the island to the mainland above all recorded flood level.

Robbins

broad and substantial, and providing immediate and effective means of escape from the city in event of storms beyond the calculated possibility.

The initial step toward the construction of this causeway was taken in 1906. The causeway is built entirely of concrete, and is 18-675 feet long, 119 feet wide at the roadway top and equipped about half way between city and mainland, with a roller-lift bridge 15 feet wide and 100 feet long, said to be the heaviest roller-lift ever constructed. The causeway is wide enough to permit abreast a passenger train, freight train, interurban train, a roadway for automobiles and other vehicles and wide sidewalks on each side for pedestrians. This is the last, protective achievement of three which have cost the people of Galveston a total of \$5,000,000; the final act in a civic program of conservatism that has few parallels in the history of cities.

The value of the total mineral output of Alaska in 1911 is estimated at \$20,370,000, compared with \$16,959,678 in 1910.
